

KATHMANDU UNIVERSITY
December 2017/January 2018

Level : BDS

Exam : BDS I (new course)

Time : 2 hr. 30 minutes

Date : December 22, 2017

Subject: Anatomy

Paper : I

Marks : 50

INSTRUCTIONS TO THE CANDIDATE

- Answer each section in a separate answer book
- Write brief, relevant and legible answers
- Illustrate your answer with well labeled diagrams whenever required
- All questions are compulsory

SECTION "B"
[25 marks]

1. Classify glands and draw a labeled histological diagram of mixed gland. [3+3=6]
2. What is notochord? Write its formation and fate. [1+2+2=5]
3. Describe the special features of sesamoid bone with two examples [3+2=5]
4. Write short notes on: [3×3=9]
 - a. Sympathetic trunk
 - b. Thin skin
 - c. Sciatic nerve

SECTION "C"
[25 marks]

5. Describe the histological features of lung with a well labeled diagram. [3+2=5]
6. Describe briefly the parts of bronchial tree with its normal histological structural changes. [3+2=5]
7. Describe briefly the action and nerve supply of the muscles of mastication. [3+3=6]
8. Write short notes on: [3×3=9]
 - a. Pericardium with its nerve supply
 - b. Paranasal air sinuses
 - c. Lacrimal apparatus

KATHMANDU UNIVERSITY
2016

Level : BDS

Exam : BDS I (new course)

Time : 2 hr. 30 minutes

Date : October 17, 2016

Subject: Anatomy

Paper : I

Marks : 50

INSTRUCTIONS TO THE CANDIDATE

- Answer each section in a separate answer book
- Write brief, relevant and legible answers
- Illustrate your answer with well labeled diagrams whenever required
- All questions are compulsory

SECTION "B"
[25 marks]

1. Mention the boundary, contents and applied anatomy of femoral triangle. [2+2+2=6]
2. Explain parts and blood supply of a typical long bone with a labeled diagram. [1+2+2=5]
3. Describe histological structure of elastic cartilage with well labeled diagram. [3+2=5]
4. Short note: [3×3=9]
 - a. Sympathetic nervous system
 - b. Spermatogenesis
 - c. Palatine tonsil

SECTION "C"
[25 marks]

5. Describe the development of interatrial septum with its congenital anomalies. [3+3=6]
6. List the layers of deep cervical fascia. Give the tracing of investing layer with its applied anatomy. [1+3+1=5]
7. Describe Bronchopulmonary segment with its applied anatomy. [3+2=5]
8. Short note: [3×3=9]
 - a. Recesses of pleura
 - b. Dangerous area of the face
 - c. Right coronary artery

Level : BDS

Exam : BDS I

Time : 3 hour

Date : October 17, 2016

Subject: Anatomy

Paper : 1

Marks : 70

INSTRUCTIONS TO THE CANDIDATE

Answer each section in a separate answer book

Write brief, relevant and legible answers

Illustrate your answer with well labeled diagrams whenever required

All questions are compulsory

SECTION "A" [35 marks]

Describe the histological structure of skeletal muscle with well label diagram. [3+2=5]

Classify joint. Explain the features of synovial joint with label diagram. [3+1+1=5]

Mention the origin, insertion, nerve supply and actions of deltoid muscle. [1+1+1+2=5]

Explain the process of formation of notochord with its significance. [3+2=5]

[5×3=15]

Short note on:

a. Arches of foot

b. Hunter's canal

c. Hassall's corpuscles

d. Sympathetic nervous system

e. Claw hand

SECTION "B" [35 marks]

Describe the boundaries, contents and clinical importance of posterior mediastinum. [2+2+1=5]

Explain the formation, tributaries and drainage of coronary sinus. [2+2+1=5]

Describe the formation and features of lateral wall of the nasal cavity. [3+2=5]

Describe the histological structure of lung with well label diagram. [3+2=5]

[5×3=15]

0. Short note on:

a. Azygos lobe

b. Angle of Louis (sternal angle)

c. Valves of heart

d. Fallot's tetralogy ✓

e. Maxillary air sinuses

Level : BDS

Paper : 1

Exam : BDS I (new course)

Marks : 50

Time : 2 hr. 30 minutes

Date : December 30, 2016

INSTRUCTIONS TO THE CANDIDATE

- Answer each section in a separate answer book
- Write brief, relevant and legible answers
- Illustrate your answer with well labeled diagrams whenever required
- All questions are compulsory

SECTION "B"

[25 marks]

1. Describe the histological structure of thymus with label diagram. [3+3=6]
2. Give the origin, course and applied anatomy of radial nerve. [3+2=5]
3. Describe the layers of Skin with a labeled diagram [3+2=5]
4. Short note: [3×3=9]
 - a. Great saphenous vein
 - b. Neurons
 - c. Thick skin

SECTION "C"

[25 marks]

5. Describe type, capsular attachments and muscles causing different movements of temporomandibular joint. [1+2+4=6]
6. Mention the boundary and structure present in nasopharynx with its applied anatomy. [2+2+1=5]
7. Mention briefly the different stage of maturation of lungs. [5]
8. Short note: [3×3=9]
 - a. Carotid sheath
 - b. Coronary artery
 - c. Sternal angle

KATHMANDU UNIVERSITY
2015

Level : BDS
Exam : BDS I (new course)
Time : 2 hr. 30 minutes
Date : September 9, 2015

Subject: Anatomy

Paper : I

Marks : 50

INSTRUCTIONS TO THE CANDIDATE

Answer each section in a separate answer book

Write brief, relevant and legible answers

Illustrate your answer with well labeled diagrams whenever required

All questions are compulsory

SECTION "B" [25 marks]

1. What is joint? Classify joint. Give the characteristic features of synovial joint. [1+2+3=6]
2. Describe the open and closed circulation of spleen with labeled diagram. [2+2+1=5]
3. Describe the root value, courses and clinical importance of sciatic nerve. [2+2+1=5]
4. Short notes on:
a. Neurulation
b. Craniosacral nervous system
c. Lanugo

SECTION "C" [25 marks]

5. List out the layers of deep cervical fascia. Explain the vertical and horizontal tracing of investing layer of deep cervical fascia. [2+2+2=6]
6. What is typical intercostal space? Write down its boundaries, contents and clinical importance. [1+1+2+1=5]
7. Describe the development of interatrial septum with its congenital anomalies. [3+2=5]
8. Short answer on:
a. Surfactant
b. Pericardium
c. External carotid artery

KATHMANDU UNIVERSITY
2015

Level : BDS
Exam : BDS I (old course)
Time : 3 hrs.
Date : September 9, 2015

Subject: Anatomy
Paper : I
Marks : 70

INSTRUCTIONS TO THE CANDIDATE

- Answer each section in a separate answer book
- Write brief, relevant and legible answers
- Illustrate your answer with well labeled diagrams whenever required
- All questions are compulsory

SECTION "A" [35 marks]

1. Enumerate the organelles of a human cell and describe the features of Golgi apparatus. [4+3=7]
2. What are the stages of spermatogenesis and how does it differ from oogenesis? [4+3=7]
3. What are the main parts of a developing long bone and its arterial supply? [4+3=7]
4. What are the parts of a chromosome? Describe briefly the Denver classification of chromosomes. [2+5=7]
5. Write short notes on:
a. Carpal Tunnel Syndrome [3+4=7]
b. Azygos vein

SECTION "B" [35 marks]

6. Enumerate the paranasal sinuses and mention their drainage [4+3=7]
7. Describe the components of a bronchopulmonary segment and mention its applied importance? [5+2=7]
8. Describe the coronary sinus with its tributaries. Mention the special features of cardiac muscle. [2+3+2=7]
9. What are the layers of pericardium and mention its innervations and its applied aspect? [3+2+2=7]
10. Name the laryngeal cartilages and its intrinsic muscles with their nerve supply. [3+2+2=7]
