

KATHMANDU UNIVERSITY
August/ September 2021

Level : BDS

Exam : BDS I (new course)

Time : 2 hour 30 minutes

Subject: Pathology

Paper : I

Marks : 50

Date : September 3, 2021

INSTRUCTIONS TO THE CANDIDATE

- Answer each section in a separate answer book
- Write brief, relevant and legible answers
- Illustrate your answer with well labeled diagrams whenever required
- All questions are compulsory

SECTION "B"

[25 marks]

1. Define neoplasia. Write the differences between benign and malignant tumours. List the routes of metastasis. [1+4+1=6]
2. Describe the pathogenesis of emphysema. List its types. [3+2=5]
3. List the causes of cell injury. Differentiate necrosis from apoptosis. [2+3=5]
4. Write short notes on: [3×3=9]
 - a. Causes of pleural effusion.
 - b. Pathologic calcification.
 - c. Bronchiectasis.

SECTION "C"

[25 marks]

5. Define anemia. Enlist the causes of iron deficiency anemia. Write the laboratory diagnosis of iron deficiency anemia. [1+2+3=6]
6. Describe the risk factors and pathogenesis of atherosclerosis. [2+3=5]
7. Define and classify leukemia. List the etiological factors of leukemia. [1+2+2=5]
8. Write short notes on: [3×3=9]
 - a. Congestive cardiac failure.
 - b. Disseminated Intravascular Coagulation (DIC).
 - c. Aetiopathogenesis of infective endocarditis.

KATHMANDU UNIVERSITY
2015

Subject: Pathology

Level : BDS

Paper : I

Exam : BDS I (new course)

Marks : 50

Time : 2 hr. 30 minutes

Date : September 18, 2015

INSTRUCTIONS TO THE CANDIDATE

- Answer each section in a separate answer book
- Write brief, relevant and legible answers
- Illustrate your answer with well labeled diagrams whenever required
- All questions are compulsory

SECTION "B" [25 marks]

1. Define inflammation. Write down the cardinal signs of inflammation. [3]
2. Define and classify shock. [1+2=3]
3. Describe the stages of lobar pneumonia. [5]
4. What are the causes of bronchiectasis and its complications? [2+3=5]
5. Write short notes on: [3×3=9]
 - a. Modes of spread of malignant tumor
 - b. Fate of thrombus
 - c. Miliary tuberculosis

SECTION "C" [25 marks]

6. Define anemia. Write the morphological changes in peripheral blood components of Iron deficiency anemia. [2+4=6]
7. Write down the aetiology and laboratory diagnosis of disseminated intravascular coagulation (DIC). [5]
8. Write down the complications of myocardial infarction (M.I.). [5]
9. Write short notes on: [3×3=9]
 - a. Sick cell anaemia
 - b. Leukocytosis
 - c. Complications of chronic Rheumatic Heart Disease

KATHMANDU UNIVERSITY
2016

Level : BDS
Exam : BDS I
Time : 3 hour
Date : October 26, 2016

Subject: Pathology
Paper : I
Marks : 70

INSTRUCTIONS TO THE CANDIDATE

- Answer each section in a separate answer book
- Write brief, relevant and legible answers
- Illustrate your answer with well labeled diagrams whenever required
- All questions are compulsory

SECTION "A" [35 marks]

1. List the causes of cell injury. Describe the morphological changes in reversible and irreversible cell injury. [1+2+2=5]
2. Define necrosis. List the type of necrosis with cause and example. [1+4=5]
3. Describe the vascular and cellular responses of acute inflammation. [5]
4. Describe wound healing by primary and secondary intention. [5]
5. Define edema. List types of edema with suitable examples. [1+4=5]
6. Define and classify shock. List the causes of hypovolemic shock. [1+2+2=5]
7. Write down the differences between benign and malignant neoplasm. [5]

SECTION "B" [35 marks]

- ✓ Outline the morphological and etiological classification of anemia. [2+3=5]
- ✓ Write down the etiopathogenesis of sickle cell anemia. [5]
1. Classify lung cancer. List the common etiologic agent and morphologic features of squamous cell carcinoma of lung. [2+3=5]
1. Define chronic bronchitis and emphysema. Describe the etiopathogenesis of chronic bronchitis. [2+3=5]
2. Write briefly on:
 - a. Rheumatic heart disease
 - b. Myocardial infarction
 - c. Complications of hypertension
 - d. Pathogenesis of atherosclerosis
 - e. Pathogenesis of infective endocarditis[3×5=15]

KATHMANDU UNIVERSITY
2016

Level : BDS

Exam : BDS I (new course)

Time : 2 hour 30 minutes

Date : October 26, 2016

Subject: Pathology

Paper : 1

Marks : 50

INSTRUCTIONS TO THE CANDIDATE

- Answer each section in a separate answer book
- Write brief, relevant and legible answers
- Illustrate your answer with well labeled diagrams whenever required
- All questions are compulsory

SECTION "B"
[25 marks]

1. Define neoplasia. Give the differences between benign & malignant tumour. [1+5=6]
2. Define pneumonia. List its type with morphology. [1+4=5]
3. Describe etiopathogenesis of chronic bronchitis. [5]
- Write short notes on: [3×3=9]
 - a. Shock
 - b. Inflammation
 - c. Morphology of squamous cell carcinoma of lung

SECTION "C"
[25 marks]

Define anaemia. Classify it. Write down the laboratory investigations to establish the diagnosis of megaloblastic anaemia. [1+2+3=6]

Write down the etiopathogenesis and morphology of infective endocarditis. [2+3=5]

Define hypertension. Describe briefly the pathogenesis of hypertension. [1+4=5]

Write short notes on : [3×3=9]

a. ITP

b. Classification of thalassemia

c. Aetiology of Disseminated Intravascular Coagulation

Level : BDS

Exam : BDS I (old course)

Time : 3 hrs.

Date : May 31, 2016

KATHMANDU UNIVERSITY
May/June 2016

Subject: Pathology

Paper : I

Marks : 70

INSTRUCTIONS TO THE CANDIDATE

- Answer each section in a separate answer book
- Write brief, relevant and legible answers
- Illustrate your answer with well labeled diagrams whenever required
- All questions are compulsory

SECTION "A" [35 marks]

1. What is necrosis? Mention various types of necrosis and difference between necrosis and apoptosis. [2+5+3=10]
2. Describe etiopathogenesis of thrombosis. List the fate and complications of thrombus. [5+5=10]
3. Write briefly on: [5×3=15]
 - a. Granuloma
 - b. Cardinal signs of acute inflammation (156)
 - c. Mechanism of cell injury
 - d. Metastatic calcification
 - e. Metaplasia

SECTION "B" [35 marks]

4. Classify anaemia etiologically and morphologically. Write down the laboratory investigations to establish the diagnosis of macrocytic anaemia. [2+3+5=10]
5. What is chronic obstructive pulmonary disease? List etiologic factors of emphysema. Describe its pathogenesis. [2+4+4=10]
[5×3=15]
6. Write briefly on:
 - a. Aplastic Anemia
 - b. Bronchiectasis
 - c. Etiological factors of bronchogenic carcinoma
 - d. Bacterial endocarditis
 - e. Morphology of Aschoff's body

Subject: Pathology

Level : BDS

Paper : I

Exam : BDS I (new course)

Marks : 50

Time : 2 hr. 30 minutes

Date : May 31, 2016

INSTRUCTIONS TO THE CANDIDATE

- Answer each section in a separate answer book
- Write brief, relevant and legible answers
- Illustrate your answer with well labeled diagrams whenever required
- All questions are compulsory

SECTION "B" [25 marks]

1. Define inflammation. Explain the vascular and cellular response to inflammation in brief. [1+5=6]
2. List the types of pneumonia based on etiology and clinical setting. Enumerate its complications. [4+1=5]
3. Classify tumors of the lung. List its etiological factors. [3+2=5]
4. Write short notes on: [3×3=9]
 - a. Difference between exudate and transudate
 - b. Etiopathogenesis of emphysema
 - c. Stages of lobar pneumonia

SECTION "C" [25 marks]

5. Describe the etiopathogenesis, morphological features, and laboratory diagnosis of iron deficiency anemia. [2+2+2=6]
6. Classify hypertension. List its complications. [3+2=5]
7. Explain the etiopathogenesis of infective endocarditis. List its complications. [3+2=5]
8. Write short notes on: [3×3=9]
 - a. Laboratory diagnosis of idiopathic thrombocytopenic purpura
 - b. Classification of congenital heart disease
 - c. Laboratory diagnosis of acute leukemia

KATHMANDU UNIVERSITY
December 2016/January 2017

BDS

BDS I (new course)

2 hour 30 minutes

January 8, 2017

Subject: Pathology

Paper : I

Marks : 50

INSTRUCTIONS TO THE CANDIDATE

Answer each section in a separate answer book

Write brief, relevant and legible answers

Illustrate your answer with well labeled diagrams whenever required

All questions are compulsory

SECTION "B"
[25 marks]

Mention the different types of necrosis with examples. What are the differences between necrosis and apoptosis? [3+3=6]

What is bronchiectasis? Describe its etiopathogenesis. [1+4=5]

What are the stages and complications of lobar pneumonia? [2+3=5]

Write short notes on: [3×3=9]

- Septic shock
- Paraneoplastic syndrome
- Vascular events in acute inflammation

SECTION "C"
[25 marks]

Define anemia. Outline morphological and etiologic classification of anemia. [2+2+2=6]
[1+4=5]

Define Rheumatic fever. Explain its pathogenesis. [3+2=5]

What are the risk factors for atherosclerosis? Describe its pathogenesis. [3×3=9]

Write short notes on:

- ITP
- Disseminated Intravascular Coagulation
- Classification of Hodgkin lymphoma

KATHMANDU UNIVERSITY
July/August 2019

Level : BDS

Exam : BDS I (new course)

Time : 2 hour 30 minutes

Subject: Pathology

Paper : I

Marks : 50

Date : August 11, 2019

INSTRUCTIONS TO THE CANDIDATE

- Answer each section in a separate answer book
- Write brief, relevant and legible answers
- Illustrate your answer with well labeled diagrams whenever required
- All questions are compulsory

SECTION "B"

[25 marks]

1. Write down the histological classification of tumors with example in each. What are the differences between benign and malignant tumor? [3+3=6]
2. Discuss the etiopathogenesis of emphysema. List its types. [3+2=5]
3. Describe stages and complications of lobar pneumonia. [3+2=5]
4. Write short notes on: [3×3=9]
 - a. Differences between necrosis and apoptosis
 - b. Vascular events in acute inflammation
 - c. Primary tuberculosis

SECTION "C"

[25 marks]

5. Describe the etiopathogenesis of rheumatic heart disease. List its morphological features. [3+3=6]
6. Define anaemia. Discuss the laboratory diagnosis of iron deficiency anaemia. [1+4=5]
7. Classify anemia on the basis of aetiology and morphology. Write down the peripheral blood smear findings of iron deficiency anemia. [4+1=5]
8. Write short notes on: [3×3=9]
 - a. Hemophilia
 - b. Hypertension
 - c. Fallot's tetralogy

KATHMANDU UNIVERSITY
December 2018/January 2019

Level : BDS

Exam : BDS I (new course)

Time : 2 hour 30 minutes

Date : January 11, 2019

Subject: Pathology

Paper : 1

Marks : 50

INSTRUCTIONS TO THE CANDIDATE

- Answer each section in a separate answer book
- Write brief, relevant and legible answers
- Illustrate your answer with well labeled diagrams whenever required
- All questions are compulsory

SECTION "B"
[25 marks]

1. Define thrombus. Describe the etiopathogenesis of thrombus formation with morphology and fate. [1+5=6]
2. Classify lung tumours. Describe the morphology of squamous cell carcinoma. [2+3=5]
3. Define emphysema. Describe its etiopathogenesis. [1+4=5]
4. Write short notes on: [3×3=9]
 - a. Wound healing
 - b. Granulomatous disease
 - c. Necrosis

SECTION "C"
[25 marks]

5. Describe the aetiopathogenesis and laboratory diagnosis of megaloblastic anaemia. [3+3=6]
6. Discuss the aetiopathogenesis of rheumatic heart disease. List its diagnostic criteria. [3+2=5]
7. Discuss the aetiopathogenesis of myocardial infarction. List its complication. [3+2=5]
8. Write short notes on: [3×3=9]
 - a. Hodgkin lymphoma
 - b. Immune thrombocytopenic purpura
 - c. Hemophilia

KATHMANDU UNIVERSITY
February/ March 2020

Level : BDS

Year: BDS I

Time : 2 hrs. 30 min.

Date: March 6, 2020

Subject: Pathology

Paper: I

Marks: 50

INSTRUCTION TO THE CANDIDATE

- Answer each section in a separate answer book.
- Write brief, relevant and legible answers.
- Illustrate your answer with well labeled diagrams wherever required.
- All questions are compulsory.

SECTION "B"
[25 marks]

1. Define thrombosis. List the types of thrombus and enumerate its fates. [1+2+3=6]
2. Describe the mechanism of wound healing. [5]
3. Describe etiopathogenesis of pulmonary tuberculosis. [5]
4. Write short notes on: [3×3=9]
 - a. Chemical mediators of acute inflammation
 - b. Pathogenesis of atopic asthma
 - c. Stages of lobar pneumonia

SECTION "C"
[25 marks]

5. Describe the aetiopathogenesis of megaloblastic anemia. [6]
6. Write down the clinical presentation and laboratory diagnosis of chronic myeloid leukemia. [2+3=5]
7. Discuss the aetiopathogenesis of myocardial infarction. List its complications. [3+2=5]
8. Write short notes on: [3×3=9]
 - a. Leukopenia
 - b. Complications of hypertension
 - c. Clinical criteria for diagnosis of rheumatic heart disease

KATHMANDU UNIVERSITY
March/April 2021

Level : BDS

Exam : BDS I

Time : 2 hr. 30 minutes

Date : April 2, 2021

Subject: Pathology

Paper : I

Marks : 50

INSTRUCTIONS TO THE CANDIDATE

- Answer each section in a separate answer book
- Write brief, relevant and legible answers
- Illustrate your answer with well labeled diagrams whenever required
- All questions are compulsory

SECTION "B"
[25 marks]

1. Define inflammation. Describe the vascular and cellular events in acute inflammation. [1+5=6]
2. Describe the gross and microscopic features of pulmonary tuberculosis. [2+3=5]
3. Define pathologic calcification. List its types with suitable examples of each. [2+3=5]
4. Write short notes on: [3×3=9]
 - a. Types of emphysema.
 - b. Septic shock.
 - c. Cor pulmonale.

SECTION "C"
[25 marks]

5. Discuss the etiopathogenesis and laboratory diagnosis of sickle cell anemia. [3+3=6]
6. Describe the etiopathogenesis and morphological features of rheumatic heart disease. [3+2=5]
7. List the common causes of lymphadenitis. Write the microscopic features of reactive and tubercular lymphadenitis. [2+3=5]
8. Write short notes on: [3×3=9]
 - a. Congestive cardiac failure.
 - b. Multiple myeloma.
 - c. Risk factors of atherosclerosis.

Level : BDS

Paper : I

Exam : BDS I (new course)

Time : 2 hour 30 minutes

Marks : 50

Date : September 3, 2021

INSTRUCTIONS TO THE CANDIDATE

- Answer each section in a separate answer book
- Write brief, relevant and legible answers
- Illustrate your answer with well labeled diagrams whenever required
- All questions are compulsory

SECTION "B" [25 marks]

1. Define neoplasia. Write the differences between benign and malignant tumours. List the routes of metastasis. [1+4+1=6]
2. Describe the pathogenesis of emphysema. List its types. [3+2=5]
3. List the causes of cell injury. Differentiate necrosis from apoptosis. [2+3=5]
4. Write short notes on: [3×3=9]
 - a. Causes of pleural effusion.
 - b. Pathologic calcification.
 - c. Bronchiectasis.

SECTION "C" [25 marks]

5. Define anemia. Enlist the causes of iron deficiency anemia. Write the laboratory diagnosis of iron deficiency anemia. [1+2+3=6]
6. Describe the risk factors and pathogenesis of atherosclerosis. [2+3=5]
7. Define and classify leukemia. List the etiological factors of leukemia. [1+2+2=5]
8. Write short notes on: [3×3=9]
 - a. Congestive cardiac failure.
 - b. Disseminated Intravascular Coagulation (DIC).
 - c. Aetiopathogenesis of infective endocarditis.
